All these students are reading in SDB High School now. All came here in class 6. They are always connected with their sponsors. The letters arrive from their sponsors - they get it - and they reply. A wonderful system to be connected is established here.

Sophia is taking classes for the bigger kids, in the high school.

We also have CSO - Career & Study Orientation - supported by JOKEY Organization. We help the students for better jobs & internship. Therefore we have a regular work-shop for the motivation for the students. Isabel is giving a presentation.

Swee + Sophia are giving a lecture for the new group.

Same way, Fabian is giving his presentation, to the new arrivals. We just want our students to have a better life. Study-Study-And finally - no job. So we want to encourage our students for internship + side jobs to support themselves for a better life. Thank you JOKEY + SK!

Lena with the kids

~ out-door trip ~

Lena was not only inside the class room, but she was involved everywhere - also in the school kitchen, helping the cooking staffs to prepare the lunch. — So wonderful!

Sussame was a experienced kindergarten teacher. She always loved to be with the children. She has amazing skills. She has given us various helpful guidelines too for better learning and teaching process.

Volunteers are a great pride for Asha School. They are very skilled, helpful and our children learn so many new things from our volunteers. We want to welcome them always ~ always and always. Thanks for helping our children.
